Index to Volume 118

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–108
Number 2 (April): 109–180
Number 3 (July): 181–300
Number 4 (October): 301–428

AUTHOR INDEX

Adams, L., & Zuckerman, D. *The effect of lighting conditions on personal space requirements.* 335–340.

Alley, T. R., & Burroughs, W. J. *Do men have stronger preferences for hot, unusual, and unfamiliar foods?* 201–214.

Aoki, T. *The relation between two kinds of U-shaped growth curves: Balance-scale and weight-addition tasks.* 251–261.

Bagley, C. R. *Factor structure of temperament in the third year of life.* 291–297.

Boivin, M. J. *The effect of culture on a visual–spatial n.emory task.* 327–334.

Chastain, G. *Effects of abruptly appearing clutter on a peripherally precued covert attention shift.* 31–44.

Chow, S. L. *Partial report: Iconic store or two buffers?* 147–169.

Christensen, L., Miller, J., & Johnson, D. *Efficacy of caffeine versus expectancy in altering caffeine-related symptoms.* 5–12.

De Koninck, J., & Brunette, R. *Presleep suggestion related to a phobic object: Successful manipulation of reported dream affect.* 185–200.

Finlay, D. C., Chorlton, M. C., & Boulton, J. C. *Motion thresholds in infants to sinusoidal gratings.* 263–270.

Foreman, N. *Correlates of performance on the Gollin and Mooney tests of visual closure.* 13–20.

Goolkasian, P., Van Wallendael, L. R., & Terry, W. S. *Recognition memory for easy and difficult text.* 375–393.

Hochhaus, L., Swanson, L. G., & Carter, A. L. *Common words are longer in apparent duration than are rare words.* 83–95.

Johnson, D. W., Johnson, R. T., Ortiz, A. E., & Stanne, M. *The impact of positive goal and resource interdependence on achievement, interaction, and attitudes.* 341–347.

Kline, T. J. B., & Boyd, J. E. *Organizational structure, context, and climate: Their relationships to job satisfaction at three managerial levels.* 305–316.

Lim, S., & Lippman, L. *Mental practice and memorization of piano music.* 21–30.

Linnett, C. M., Morriss, R. H., Dunlap, W. P., & Fritchie, C. J. *Differences in color balance depending upon mode of comparison.* 271–283.

Loosen, F. *Preferences for capital letters of the alphabet.* 227–249.
Luchins, A. S., & Luchins, E. H. *Task complexity and order effects in computer presentation of water jar problems.* 45–72.
Murray, J. B. *Psychoendocrinological aspects of affective disorders.* 395–421.
Murray, J. B. *Psychophysiological aspects of nightmares, night terrors, and sleepwalking.* 113–127.
Nahinsky, I. D. *Belief that experiments work and equal distribution of ignorance: What happens when these tendencies compete?* 73–82.
Peeples, E. E., & Retzlaff, P. D. *A component analysis of handwriting.* 369–374.
Reid, H. M., & Muench, J. L. *Recovery of susceptibility following audiogenic seizure in mice.* 285–290.
Reinhardt-Rutland, A. H. *Induced rotary movement during eye movements: Displays with unequal spacing of pattern.* 129–137.
Reinhardt-Rutland, A. H. *Spatial-contrast movement aftereffect can be rotary: Support for link with aftereffect of induced movement.* 361–367.
Sherrard, C. *Developing discourse analysis.* 171–179.
Shimazaki, T., Tsuda, Y., & Imada, H. *Strategy changes in human contingency judgments as a function of contingency tables.* 349–360.
Shmotkin, D. *The validity of simulated prediction of behavior.* 317–325.
Tripathi, K. N. *Effects of contingency and timing of reward on intrinsic motivation.* 97–105.
Uba, L., & Chung, R. C-Y. *The relationship between trauma and financial and physical well-being among Cambodians in the United States.* 215–225.
van Leeuwen, C. *Testing organization preferences in serial pattern learning.* 139–145.

TITLE INDEX

Belief that experiments work and equal distribution of ignorance: What happens when these tendencies compete? *Irwin D. Nahinsky.* 73–82.
Common words are longer in apparent duration than are rare words. *Larry Hochhaus, Leila G. Swanson, & Ann L. Carter.* 83–95.
A component analysis of handwriting. *E. Edward Peeples & Paul D. Retzlaff.* 369–374.
Correlates of performance on the Gollin and Mooney tests of visual closure. *Nigel Foreman.* 13–20.
Developing discourse analysis. *Carol Sherrard.* 171–179.
Differences in color balance depending upon mode of comparison. *Christopher M. Linnett, Robert H. Morriss, William P. Dunlap, & Charles J. Fritchie.* 271–283.
Do men have stronger preferences for hot, unusual, and unfamiliar foods? *Thomas R. Alley & W. Jeffrey Burroughs.* 201–214.
The effect of culture on a visual–spatial memory task. *Michael J. Boivin.* 327–334.
The effect of lighting conditions on personal space requirements. *Leslie Adams & David Zuckerman.* 335–340.
Effects of contingency and timing of reward on intrinsic motivation. *Kailas Nath Tripathi.* 97–105.
Effects of abruptly appearing clutter on a peripherally precued covert attention shift. *Garvin Chastain.* 31–44.

Efficacy of caffeine versus expectancy in altering caffeine-related symptoms. *Larry Christensen, Jeff Miller, & Donna Johnson.* 5–12.

Factor structure of temperament in the third year of life. *Christopher R. Bagley.* 291–297.

The impact of positive goal and resource interdependence on achievement, interaction, and attitudes. *David W. Johnson, Roger T. Johnson, Ann E. Ortiz, & Marybeth Stanne.* 341–347.

Induced rotary movement during eye movements: Displays with unequal spacing of pattern. *A. H. Reinhardt-Rutland.* 129–137.

Mental practice and memorization of piano music. *Serene Lim & Louis G. Lippman.* 21–30.

Motion thresholds in infants to sinusoidal gratings. *David C. Finlay, Mark C. Chorlton, & J. C. Boulton.* 263–270.

Organizational structure, context, and climate: Their relationships to job satisfaction at three managerial levels. *Theresa J. B. Kline & J. Edwin Boyd.* 341–347.

Partial report: Iconic store or two buffers? *Siu L. Chow.* 147–169.

Preferences for capital letters of the alphabet. *Franz Loosen.* 227–249.

Presleep suggestion related to a phobic object: Successful manipulation of reported dream affect. *Joseph De Koninck & Raymond Brunette.* 185–200.

Psychoendocrinological aspects of affective disorders. *John B. Murray.* 395–421.

Psychophysiological aspects of nightmares, night terrors, and sleepwalking. *John B. Murray.* 113–127.

Recognition memory for easy and difficult text. *Paula Goolkasian, Lori R. Van Wallendael, & W. Scott Terry.* 375–393.

Recovery of susceptibility following audiogenic seizure in mice. *Howard M. Reid & Jean L. Muench.* 285–290.

The relation between two kinds of U-shaped growth curves: Balance-scale and weight-addition tasks. *Tazuko Aoki.* 251–261.

The relationship between trauma and financial and physical well-being among Cambodians in the United States. *Laura Uba & Rita Chi-Ying Chung.* 215–225.

Spatial-contrast movement aftereffect can be rotary: Support for link with aftereffect of induced movement. *A. H. Reinhardt-Rutland.* 361–367.

Strategy changes in human contingency judgments as a function of contingency tables. *Tsuneo Shimazaki, Yasuhiro Tsuda, & Hiroshi Imada.* 349–360.

Task complexity and order effects in computer presentation of water jar problems. *Abraham S. Luchins & Edith H. Luchins.* 45–72.

Testing organization preferences in serial pattern learning. *Cees van Leeuwen.* 139–145.

The validity of simulated prediction of behavior. *Dov Shmotkin.* 317–325.
